- ENGINEERING AND STRUCTURED CABLING
- WHITE-GLOVE INSTALLATION
- STELLAR CUSTOMER SUPPORT

LIFESTYLE TECHNOLOGY

WE DESIGN SOLUTIONS AS UNIQUE AS PEOPLE WHO RELY ON THEM

Our lifestyle technology philosophy emphasizes lifestyle enhancement. We start with a thorough assessment of the physical environment and how you live/work/play today. We ask about your needs, interests and life activities so we can recommend the ideal solutions.

Our goal is to exquisitely tailor our systems into your ambiance. Together, we plan for potential changes that may require future technology upgrades or additions.

Equally important is the purpose of the technology: to empower you as a smart homeowner. Lifestyle technology can provide everything from seamless comfort and entertainment to energy savings and security - conveniently managed with a single touch.

WHY WORK WITH US?

We are a proud South Florida regional leader and innovator in Smart Home Technology, Commercial Integration and Luxury Marine Technology.

We excel at integrating luxury technology. It's much more than our profession, it's our passion. Geeks of Technology brings an extraordinary ability to seamlessly blend technology into people's lives – at home, at work, and at sea.

Architects, Builders and Developers choose GT for our superior design engineering services, knowing that our projects are delivered on time and on budget.

Discerning Interior Designers trust us to seamlessly integrate our technology with the ambiance they create.

Homeowners are certain that their new smart systems incorporate gorgeous aesthetics, and deliver flawless functionality and ease of use.

HOME THEATER

What's more exciting than an intimate home theater experience that delivers the audio and visual quality of a state-of-the-art cinema? GT precisely engineers your designated home theater room to maximize audio/visual performance. Grab some popcorn, then sit back and enjoy your own private viewing.

DISTRIBUTED AUDIO

Multi-room audio systems allow for your audio sources to be played in any or all the rooms. Indoor and outdoor audio zones can be selected with ease, and music fills every space like magic. Multiple speaker types – in-walls, in-ceiling, bookshelves, yard, shower or pool – empower us to design unique systems, blending in and minimizing the visual impact.

VIDEO DISTRIBUTION

It's an abundance of video technologies in today's AV world. We mastered the coexistence of today's and tomorrow's technologies through Video Distribution. We make it so transitioning video across spaces, simulcasting or streaming on multiple displays takes only a simple touch. Did we mention that it always works? Each time. Consistently.

IT NETWORKS & WiFi

Any smart home system relies on a strong, functioning infrastructure. At GT, we are professional grade network builders. We design and install the most reliable wired and wireless networks, engineered to meet and exceed the demands of any smart home or business. We create the backbone that guarantees your devices are always connected.

HIGH PERFORMANCE

EXQUISITE FINISH DETAILS, COMFORT, CONVENIENCE AND SECURITY

SMART CONTROLS

EXQUISITE FINISH DETAILS, COMFORT, CONVENIENCE AND SECURITY

LIGHTING DESIGN & CONTROLS

Elegance and luxury are easier to achieve than ever, enabling home owners to achieve massive energy savings. GT's custom designed lighting systems incorporate lighting controls like dimmers, stylish keypads or touch panels, and allow you to set the room to your optimal lighting preference. Scene presets provide instant lighting adjustment for entertaining, relaxing, reading, romance or any mood.

MOTORIZED WINDOW TREATMENTS

Acting as an effective shield against solar UV radiation, this is the best protection your can choose for furniture and floors. The added benefits are energy savings on heating and cooling, increasing privacy and enhancing the interior décor. With an endless choice of fabrics, GT crafts window treatments for any preference — motorized shades, black-outs, drapes or blinds.

CLIMATE CONTROL – HVAC

Environmental controls for temperature and humidity are now easier than ever with digital climate control solutions from GT. With individual zone adjustments, intelligent intuitive controls and integration with the lighting controls and motorized windows treatments, you can enjoy the perfect indoor climate, while saving power and resources.

SECURITY & VIDEO SURVEILLANCE

Best protection for your home or business comes from selecting quality and reliable components, and adopting security options to fit individual needs. GT's security & video surveillance systems are integrated with other systems in your home such as lighting, shades, locks, and fire/CO detectors, allowing for customized responses to various emergencies.

TECHNOLOGY FOR HOME

We create smart homes for smart homeowners.

Sometimes we work one-on-one with the homeowner. Most often, we create together with architects, interior designers, and builders to incorporate top-of-the-line features into their home design.

Each individual or integrated solution we install is customized to provide comfort, convenience and control.

- NEW CONSTRUCTION
- REMODELING
- CONCEPT DESIGN
- RETROFITS

WORK & SCHOOL

Modern business runs on technology. Enterprise Automation is the ultimate productivity enhancer.

Geeks of Technology customizes each corporate solution based on your work environment, and designs scalable solutions tailored to improve communications, enhance security and control energy use.

- BOARDROOMS
- HOSPITALITY
- CONFERENCE ROOMS
- RETAIL
- INTEGRATED BUILDING
- MDUs

TECHNOLOGY DESIGN

WHITE GLOVE SERVICES FROM START TO FINISH. YOU'RE IN GOOD HANDS.

As a regional leader in technology integration, we consistently provide unparalleled service to deliver easy-to-use, reliable, energy-saving and aesthetically pleasing solutions. We work with the top vendors in the industry and are constantly sourcing the best products and accessories available in a rapidly changing market.

We are a dedicated service company. From design, automation and integration to ongoing client support, you'll find us friendly, knowledgeable and eager to explain or answer questions. That's how we assure every GT client is smart about using and managing their smart technology systems.

DISCOVERY

We listen to your needs, desires, life activities and interests. Our goal is to educate clients on available options, and to define the project scope and budget requirements.

ENGINEERING

The proposed solution takes shape. Initial engineering drawings, specifications and a proposal are generated. Additional customer preferences, revisions and annotations are implemented, until the desired system functionality, aesthetics and performance are met.

INSTALLATION

A multiple-phase process, starts with generating final drawings and documentation. Next is cabling, furnishing equipment, installation and programming. Every step of the way, our word class craftsmen ensure that every system is built for long life reliability.

SUPPORT

We stand behind our installs, and are always happy to solve any issue your smart home system is giving you. Our cloud-based system-health monitoring services ensure a smooth system functionality and guarantee customers' peace of mind.
